**LISTING OF CLAIMS:**

1. (canceled).
2. (previously presented): A grommet for holding a wire harness including a plurality of wires on which an adhesive tape is wound, the wire harness has a water-stop portion, and a water-stop agent is filled in interstices between the plurality of wires at the water-stop portion, the grommet comprising:
  - a first division member, having a convex portion formed on an outer face thereof; and
  - a second division member, having a concave portion for receiving the water-stop portion, the concave portion having a shape corresponding to a cross-sectional shape of the wire harness,wherein an inner face of the first division member is pressed against the water-stop portion of the wire harness when the convex portion of the first division member is pressed toward the second division member; and
  - wherein the inner face of the first division member of the grommet has a flat face.
- 3-8. (canceled).
9. (new): A grommet according to claim 2, wherein the inner face of the first division member does not correspond to a cross-sectional shape of the wire harness.

10. (new): The grommet according to claim 2, wherein the wire harness has a substantially circular cross-section.
